

## Beat Online Black Jack

Below you will find the correct strategy for **blackjack**, depending on what software the casino you are playing at uses. You can find out what software each casino uses by looking at our [Software List](#) (Pages 12-14) or our [Casino List](#) (Pages 15-18)

### How we use the strategy charts.

Looking at the left column "Your hand", we find the row in which our first two cards belong. Then we look at the top row "Dealer's Card", and we find the column that corresponds to the dealer's first card. Then we find where the row with our hand and the column with the dealer's card meet and we see a symbol (H,S,P,D etc).

### What the symbols mean.

- "H" means "Hit".
- "S" means "Stand".
- "D" means "Double".
- "P" means "Split".
- "R" means "Surrender".

Explanation :

WR (wagering requirements) - The minimum amount you have to bet before withdrawing from the casino. When you see a number between parenthesis eg. (x20)/(10x)/(x30) , that means you have to make a total of bets equal to twenty/ten/thirty time your deposit plus bonus. If you see (x10 b) , b means you only have to bet 10 times the bonus.

If you want to try a casino not listed here **do so at your own risk.**
